SCSE's Chen Sihao (Computer Science, Year 4) makes a historical first win at The Global Undergraduate Awards 2021.

Chen Sihao (Computer Science, Year 4) has been awarded the **2021 Global Winner in the Computer Science category by The Global Undergraduate Awards**. The award was granted for Sihao's final year project – "Learning to See in the Dark – Low Light Image Enhancement".

Under the guidance of Dr Li Chongyi and Prof Loy Chen Change, Sihao explored deep learning methods to enhance images taken in poor lighting conditions. The project went through a rigorous judging process led by about 500 expert academics worldwide and eventually selected as the top

performing entry in the Computer Science category. It is noteworthy that it is the first time that NTU student has become the Global Winner in the Computer Science category.

The Global Undergraduate Awards is the world's leading undergraduate awards programme, which acknowledges top undergraduate work. Alongside Sihao, other 2021 Global Winners include undergraduate students from world's top universities such as ETH Zurich, University College London, University of Toronto, Karolinska Institute, and several others.

As the Global Winner, Sihao is invited to attend the Global Undergraduate Summit in Dublin, Ireland in November this year. He will be attending the ceremony virtually to receive the Thomas Clarkson Gold Medal and certificate of recognition.

The team would like to thank SenseTime for their generous support.

This is to certify that
Chen Sihao
from
Nanyang Technological University
was named
Global Winner
in the
Computer Science

category in **The Global Undergraduate Awards 2021** Programme.

The Global Undergraduate Awards is an international academic awards programme that recognises originality, innovation, and excellence at the undergraduate level. This individual's work has received the top award in this category, which was open to all undergraduate students in universities, colleges, and institutes around the world.

The submissions were assessed by a Judging Panel of international academics, led by a Chair or Co-Chairs, and the process has been deemed as fair and appropriate.

Jim Barry
Chair
